

# 2022 Giving Report

After more than a decade of operations as The Winer Family Foundation, we have undergone an exciting change. As of February 2023, we are now the HopeStar Foundation. We remain committed to our mission and vision, and continue to focus on the health and development of children and families. Our foundation takes a whole child and whole family approach to building well-being in North Carolina. We go upstream and partner with systems and community leaders to prevent adverse experiences before they happen. Science tells us what parents already know: preventing trauma and fostering our children’s potential unleashes powerful opportunities for everyone.

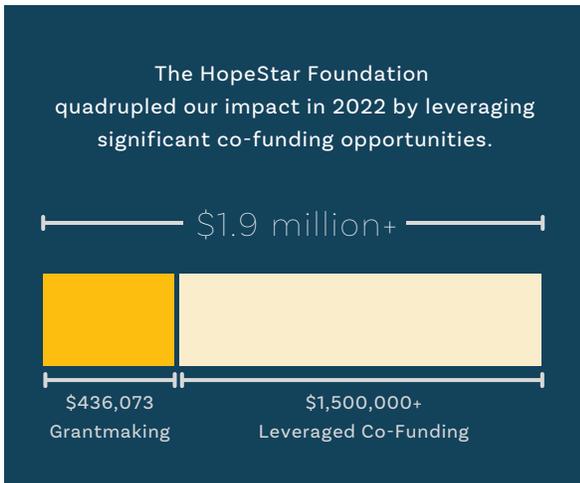

## Goal and Priorities

Our goal is to build a resilient culture in North Carolina by increasing health, safety, and dignity within all communities through systems-level strategies that address the root causes of inequities.

We are focusing our funding towards building a state where all mothers and babies thrive, and transforming systems to build community resilience.

**Maternal & Infant Health**

**Building Community Resilience**

# Strategic Grants
